GALTEX MASONCRETE

GALTEX, in its drive for consistent innovation proudly previews to you: GALTEX MASONCRETE.

A premium product that gets you think differently about MARBLE / CEMENT & CONCRETE. For those who have only associated them with RCC, beams and structures, Yet like to bring in that raw effect to decorate your home - We tell you... RAW is WOW!

With the minimalist, basic look trending in, and bright plastered walls getting out – to get the real raw cement look in the variants you prefer, we invite you to try MASONCRETE.

1. THE MOUSSE FINISH

Imagine butter cream or chocolate mousse finish on walls, the smoothest possible cement finish you can ask for. That is the super smoothest Masoncrete Mousse finish, for special walls. You can make them look more delicious with bright color washes & Galtex Clear for more sheer sheen.

2. RICE PAPER FINISH

We are used to plastered and painted walls of all types. The rice paper finish is the perfect balance we have achieved with MASONCRETE, smoother yet can get smoothest if you like. A perfect choice for signature walls indoors. The effect is very porous and breathable walls, yet letting you color wash as you prefer. Great for Spanish wall themes.

3. THE SLAB FINISH

Best suited for entire exterior finishing, patios, facades, and focus areas – this finish leaves all the careful careless elements of concrete, the sandy texture and the rawness of newly done and cured, cement concrete. The Slab finish goes quite light on your walls, unlike the heaviness of the cladding. You can color wash it any time to refresh the look.

++++++
